about what our great river has done for an an engineer, itself. If human energy could straighten the bed of the Mississippi from Carro to the gulf, the river would not be satisfied with its new bed for twenty-four hours, but would immedialely begin its customary scooping out bends, first to the east and then to the west, antil in the course of time, and no distant time at that, it would have its old 1350 miles of length, its natural, easy, four-inch fall, and its quiet four-mile current. Within the recollection of living men various cut-

weal, pigs, poultry, vegetables, butter, eggs milk, etc., from our country friends and pre pared dishes of all kinds from city house keepers will be gratefully received at any time, either at the association rooms, 30 Jefferson street, or at the dining hall, 247 and good bargains. Their manufacturing department is complete. They not only use the best material, but also employ none but the best mechanics. Give them a call and the best mechanics. Give them a call and but what the river lost in length at that but what the river lost in length at that but what the river lost in length at that but what the river lost in length at that but what the river lost in length at that but what the river lost in length at that length at the river lost in length at that length at the river lost in length at that length at the river between Cairo and Memphis was shortened in one day, by the cutoff at Devils Eibow, fully twenty miles, but what the river between Cairo and Memphis was shortened in one day, by the cutoff at Devils Eibow, fully twenty miles, but what the river between Cairo and Memphis was shortened in one day, by the cutoff at Devils Eibow, fully twenty miles, but what the river between Cairo and Memphis was shortened in one day, by the cutoff at Devils Eibow, fully twenty miles, but what the river lost in length at that Main street. It is the hope of the associa-tion to raise \$3500, alloting \$500 to each of the seven table committees. May God in-cline the hearts of all to help us by the and so it will go on forever. One of the im-mediately obvious effects of a sudden cutoff is an increase in the velocity of the current a greater descent in a given distance there than the law of hydraulics require. An-other effect is to raise the general level of the river surface immediately below the cutoff and to depress it above. This condition, that is the current being made abnormally rapid, is uncomfortable, so to speak, to the river and it begins immediately to repair the damage. When the cutoff at Devils Elbow occurred, the general level of the sur-

Unabated Success Of the popular series of drawings of the Commonwealth Distribution Company. Forty-second drawing March 31st, when \$112,400 will be given away. Whole tickets, \$2; halves, \$1. Address R. M.
